

Kudelski Security Announces Partnership with SentinelOne

Company's Focus on Endpoint Security Expands With the Addition of New Technology Offerings for Clients in the United States

CHESEAUX-SUR-LAUSANNE, Switzerland and PHOENIX, September 19th, 2018 – Kudelski Security, the cybersecurity division within the Kudelski Group (SIX:KUD.S), today announced it has signed a reseller agreement with [SentinelOne](#), the autonomous endpoint protection company. After a rigorous analysis, including technology testing and a business review, the company will add SentinelOne products to its lineup in the United States for endpoint protection.

“Endpoint security technologies are the front line of many cyber defense strategies, and key to helping clients rapidly identify and remediate threats,” said Rich Fennessy, chief executive officer, Kudelski Security. “With the addition of SentinelOne to our selective list of highly qualified technologies, we’re able to offer clients best-in-class solutions for endpoint protection.”

Having focused on the endpoint since the company’s inception through a managed service offering, Kudelski Security has sought alternative technologies that can be deployed and maintained by clients, providing capabilities suited to their organizational needs and regional preferences.

“Our goal is to ensure that we have the tools needed to help clients mitigate threats in a way that best suits their organization’s needs,” continued Fennessy. “From on-premise, to the cloud, to managed services, clients in the U.S. and Europe have different needs. We want to provide clients a range of tested and proven capabilities to ensure they have the ability to protect their most precious assets. We’re pleased that SentinelOne is being added to our expanded endpoint portfolio.”

Kudelski Security launched its Managed Detection and Response (MDR) as a managed service in February 2017 and was immediately recognized for its vision by Gartner in its [Market Guide for Managed Detection and Response \(MDR\) Services](#) as a Representative Vendor. Powered by the 24x7x365 Cyber Fusion Centers in Phoenix and Cheseaux, Switzerland, Kudelski uses people, process and technology to quickly identify malicious activity and accelerate incident response actions to safeguard critical assets and data.

About Kudelski Security

Kudelski Security is the premier advisor and cybersecurity innovator for today’s most security-conscious organizations. Our long-term approach to client partnerships enables us to continuously evaluate their security posture to recommend solutions that reduce business risk, maintain compliance and increase overall security effectiveness. With clients that include Fortune 500 enterprises and government organizations in Europe and across the United States,

we address the most complex environments through an unparalleled set of solution capabilities including consulting, technology, managed security services and custom innovation. For more information, visit www.kudelskisecurity.com.

About SentinelOne

SentinelOne delivers autonomous endpoint protection through a single agent that successfully prevents, detects and responds to attacks across all major vectors. Designed for extreme ease of use, the S1 platform saves customers time by applying AI to automatically eliminate threats in real time for both on premise and cloud environments and is the only solution to provide full visibility across networks directly from the endpoint.
