FORTINET & KUDELSKI SECURITY

Delivering World-Class Network, Endpoint, Application, and Access Security

For 15 years Kudelski Security and Fortinet have partnered to offer enterprise clients innovative, solutions to secure and simplify their IT infrastructure. The combination of Fortinet's powerful network security solutions and Security Fabric, with Kudelski Security's wealth of operational experience and deep resources has helped hundreds of organizations across Europe and the US secure their entire network, from IoT devices to the cloud.

Kudelski Security has rich experience delivering tailored, business-oriented security solutions. In 2019 the company was named in the top 20 Managed Security Services Providers worldwide by MSSP Alert, and a leader in emerging MSSPs by Forrester. With over 300 engineers and security professionals on hand, Kudelski Security has the capabilities to design, build, and manage Fortinet solutions for any enterprise environment.

The #1 Network Security Solution

Fortinet solutions combine to provide a world-class network security fabric. Key advantages include:

- Next-Generation Firewall with Secure SD-WAN
- NOC-SOC Management & Analytics
- Identity & Access Management
- Public, Private & Multi Cloud Security
- Approved Forticare Provider (L1/L2 Support)
- Secure Web Applications
- Protection Against Email Threats
- Support for Partner API Program

Fortinet Solutions Made Easy

Architecture & Design

Each project is tailored to the customer's unique requirements and network arichtecture.

Implementation & Design

Fortinet solutions integrate seamlessly with your existing security architecture and technologies.

Management & Support

Get total peace of mind. Kudelski Security provides comprehensive support and fully managed Fortinet solutions.

Fortinet provides top-rated network and content security, as well as secure access products that share intelligence and work together to form a cooperative fabric. Our unique security fabric combines security processors, an intuitive operating system, and applied threat intelligence to deliver broad protection and visibility to every network segment, device, and appliance, whether virtual, in the cloud, or on-premises. Security resources automatically synchronize to enforce policies, coordinate automated responses to threats, and easily manage different security solutions and products through a single console
