

MDR ONE Resolute

MDR ONE Resolute is the straightest path to cyber resilience in a threat-complex world. Powered by our 24/7 Cyber Fusion Centers and FusionDetect™ XDR platform, the turnkey solution seamlessly integrates into your existing security tech stack and accelerates the time from alert to action, from remediation to risk reduction.

Despite huge advances in security, cyber defenders are constantly catching up. The number of incidents is increasing, the speed of attacks is accelerating, and AI is fueling a new generation of advanced, sophisticated threats. MDR ONE Resolute gives you back the upper hand. It removes the complexity of point solutions, accurate detection and investigation, and drives effective response that shuts down the attack and builds up your resilience.

“

Honestly, we view it more like a partnership than a vendor. They [Kudelski Security] are part of our team, part of our organization.”

VP corporate security, financial services technology

Reach a higher state of resilience with 24/7 risk-based threat detection, investigation, and response

- **249%** Return on Investment
- **68%** Reduction in time to detect, investigate, and respond
- **<6 months** The breakeven point for outsourcing MDR to Kudelski Security

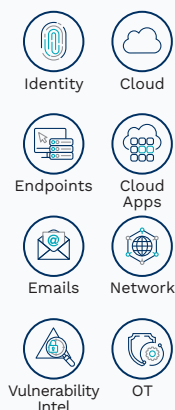

Over a three-year period. From Forrester Total Economic Impact™ Report on Kudelski Security's MDR, Dec 2023

FULL VISIBILITY - ACCESS TO INVESTIGATION PLATFORM & CLIENT PORTAL

MDR ONE RESOLUTE – MOVING THE NEEDLE ON RISK

We leverage cutting-edge technologies, advanced analytics, and broad cybersecurity expertise to drive greater security outcomes and widen the gap between you and your adversaries.

1. Faster time to value and improved ROI

Onboarding is rapid and straightforward, taking weeks not months. MDR ONE Resolute integrates into your existing security tech stack and no complex SIEM deployments are needed.

2. Unlimited data ingestion at a predictable cost

The ingestion of unlimited data opens up the possibility of full security visibility. Cost is pegged to the number of endpoints, not the volume of data.

3. Risk-based detection & rapid response

Context-rich attack stories, prioritized by risk score, enable us to conduct laser-focused investigation and human-led threat hunting activity that surface real incidents and accelerate response.

4. Increased collaboration & full transparency

We act as an extension of your own security teams and champion a partnership approach to threat detection and response. All information is available 24/7 via the Client Portal and the XDR platform interface.

5. Reduce risk, optimize business impact, improve resilience

Resiliency guidance helps you move toward a more proactive stance with actionable insights on how to harden your security posture.

“

Before it would take us days; now it takes minutes or maximum 1 hour to detect incidents. Our detection capabilities are now much better than before MDR.”

Senior Manager, security operations, packaging and processing

WHAT SETS US APART

Flexible MDR service,
tailored to your needs

Industry-recognized,
pure-play security provider

Threat hunters who
proactively look for the
unknown

24/7 incident response team
that acts with you, or on
your behalf

Risk-reduction partner with
a plan for your long-term
resilience
